### PROJECT DATES

November 1997 - March 1998

### CONSULTANT COST

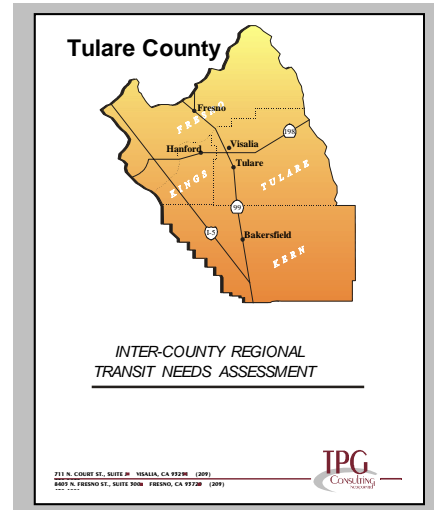

\$28,000

### FIRM INVOLVEMENT

Transit Planning

### PROJECT STATUS

Design Completed

## INTER-REGIONAL TRANSIT STUDY TULARE COUNTY ASSOCIATION OF GOVERNMENTS

TPG Consulting, Inc. completed the initial study phase of the development of inter-county transit service between Fresno, Tulare, Kings and Kern counties. This study evaluated the feasibility of provision of transit service along selected key corridors between major cities. A series of surveys were completed to determine the attitudinal values of employers, employees and households. Full profiles of current transit services in each of the counties were provided as well as socio-economic data for each area.

The study estimated potential rider-ship demand for each of the critical corridors. From that information and service factors, each corridor was ranked. Implementation strategies were provided along with sample of joint powers agreements. Finally, the report established a coordinating council of transit operators to continue the efforts toward implementation of the selected service corridors.
